

AquaCUE® Flow Measurement Manager

Software At A Glance

At A Glance is your AquaCUE control center. It is a modular dashboard, giving you a snapshot view of current and historical activity, real-time status for any issues that may need attention, and access to all AquaCUE major functions.

To reposition a module, simply click and drag. Available modules are described here.

Flow Health

Overview of any flow issues in your water system. Select all the meters in the system or select a specific group to view.

Click ➡ to see a list of accounts currently reporting the condition.

Communication Health

Number and % of endpoints and meters reporting with and without issues for the time period selected, as well as a list of endpoints with reported issues.

Top Accounts By Usage

Displays the top 25 accounts ranked by weekly consumption.

Click ➡ to see account details.

System Water Usage

Snapshot of the water usage in your system. Compares this week's consumption with last week's.

Device Health

The number and percentage of devices—endpoints, encoders and meters—reporting with and without issues.

Valve Status

Displays the general valve status details of meters with valves. Open, Partial, Closed and exception valves are shown.

Favorites

Displays accounts selected as "favorites" ★ on the Monitor page. Click column headers to sort. Click ➡ to see account details on the Monitor page meter card.

System Water Temperature

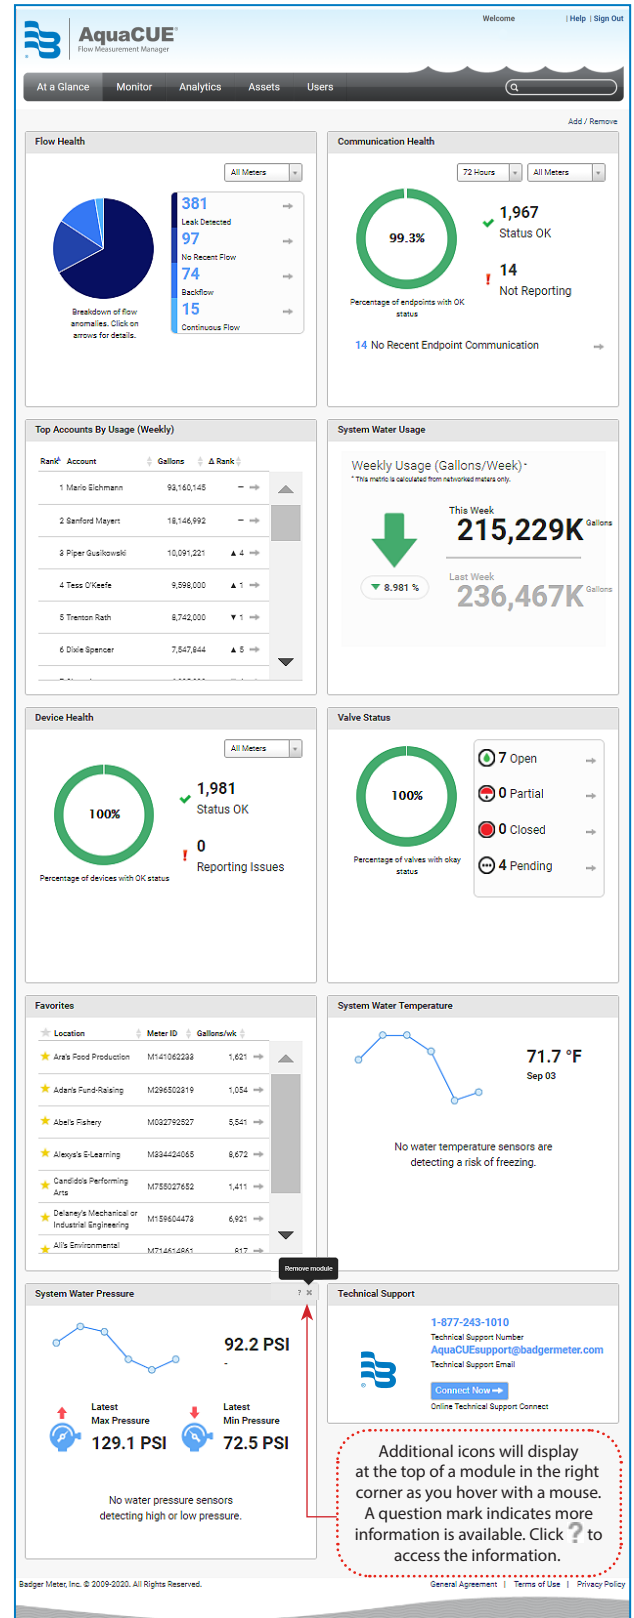

Displays the average temperature, freeze risk, and high freeze risk of meters with sensors.

System Water Pressure

Displays water pressure statistics of meters with sensors.

Technical Support

The phone number and email to contact Badger Meter Technical Support, and a link when you need to connect online.
