

LiftMaster's Specialty Overhead Operator Now Accommodates Larger Commercial Doors and Gates

Oak Brook, IL, January 9, 2019 — [LiftMaster®](#), a leading brand of professionally installed perimeter access control solutions, today announced the HCTDCUL Specialty Overhead Operator is now available with 14- and 16-foot rails that will accommodate up to 1,000-pound doors and gates for increased installation opportunities. HCTDCUL's unsurpassed safety, reliability and quiet operation, has made it the high traffic door opener of choice for parking garages in multifamily residential applications. Offering extended rail sizes will now make HCTDCUL a perfect solution for additional commercial applications such as for car dealerships, fire stations and warehouses.

"The HCTDCUL is an outstanding specialty overhead operator," said Jeff Klein, Vice President of LiftMaster's Commercial Business Unit. "By extending the rail sizes to accommodate larger doors, we are able to offer HCTDCUL's exclusive features for a broader variety of applications."

HCTDCUL's ultra-quiet smooth operation is engineered to reduce wear and tear on the door and operator, helping to extend the life of the system and increase uptime. Other key features that make the HCTDCUL stand out among other operators include:

- **Integrated Battery Backup:** Including battery backup to its low-maintenance design helps to reduce unplanned service calls and ensures access even when the power is out.
- **Selectable Speed Control:** Twenty-five percent faster than standard operators, the HCTDCUL improves speed for productivity and/or traffic flow.
- **Real-Time Diagnostics:** The HCTDCUL advanced control boards allow dealers to install and troubleshoot more efficiently.

- **Smart Access Control:** myQ connectivity enables secure monitoring and control of the operator and door from anywhere with a smartphone, tablet or computer.

Dealers can also offer customers ways to further expand and control their HCTDCUL access solution with a variety of powerful accessories like the [LiftMaster CAPXL](#) for guest management, [Red/Green Traffic Light](#) for traffic control and the [Loop Detector](#) for effortless exits.
