Chairside Adjustment & Polishing of Acrylic

- NTI® Universal cutters adjust all types of acrylics
- Quickly creates incredibly smooth surfaces
- No pumice or rag wheel required

**Suggested Techniques**

**Step 1**
Use the NTI® Universal cutters, with a light pressure, to adjust the appliance.

RPM – 15,000-20,000

**Step 2**
Use the green acrylic polisher to make final adjustments and to smooth the surface prior to polishing.

RPM – 15,000

**Step 3**
Use the gray acrylic polisher to pre-polish the appliance and bring the surface to a sating finish.

RPM – 10,000

**Step 4**
Use the yellow acrylic polisher to create a high shine on the appliance.

RPM – 7,000

**BE SURE TO USE A LIGHT PRESSURE AND NEVER LEAVE THE CUTTER OR POLISHER IN THE SAME SPOT FOR MORE THAN 2 SECONDS.**
