Layering Technique

The Simile Nano Anatomical

Physical Properties & Indications

Why Nano Technology Matters

A little nano goes a long way.
**Simile® Nano**

**Why Simile?**
- You prefer a firm viscosity (like soft dough).
- You appreciate a simple technique and high shade selection to find your match.

**Artiste® Nano**

**Why Artiste?**
- You prefer a creamy viscosity (like peanut butter).
- You’re an ‘Artiste’ and want exceptional polishability and performance.

---

**CONVENIENT DELIVERY SYSTEM**
Choice of single dose or syringe.

**Sculptable**
A firmer viscosity with soft handling designed to not slump or stick to the instrument for easy placement.

**EXTRAORDINARY SHINE**
Visible as soon as you handle it.

**POLISHABILITY**
Nano-hybrid filler produce an easy, smooth polish that lasts over time.

**LOW WEAR RATES**
For beautiful long-lasting restorations.

**RADIOPAQUE**
Easy for the clinician to see on an x-ray.

**Artiste Nano**

**IDEAL HANDLING**
Non-slippery, non-sticky, creamy consistency for effortless sculpting and shaping.

**CONVENIENT DELIVERY SYSTEM**
Choice of single dose or syringe.

**HIGHLY ESTHETIC**
Exceptional polishability and performance.

**RADIOPAQUE**
Easy for the clinician to see on an x-ray.

---

**INDEPENDENTLY PROVEN:**
- Nanosized filler particles provide an excellent final polish.
- Very good interproximal contacts are achieved.

---

**Body Shades**
- A0, A1, A2, A3, A3.5, A4
- B0, B1, B2, B3, B4
- C1, C2, C3, C4
- D2, D3, D4
- Opaque Universal, Clear Incisal

---

**CLASS 1**
CLASS 2
CLASS 3
CLASS 4
CLASS 5

---

**Simile Nano and Artiste Nano perform well on any tooth classification or location.**

---

**Comparison**
- **Simile Nano**
  - Features & Benefits
  - Available in A0, A1, A2, A3, A3.5, A4
  - Ideal for patients with sensitive teeth or those requiring a gentle approach.

- **Artiste Nano**
  - Features & Benefits
  - Available in A0, A1, A2, A3, B0, B1, B2, B3, C1, C2, C3, D2, D3, Opaque Universal, Clear Incisal
  - Ideal for patients seeking a high degree of aesthetic performance and precision.
Layering Technique

The Artiste Nano Anatomical Layering Technique

Why Nano Technology Matters

Our engineered hybrid composites offer a perfect combination of esthetics and strength for optimal polishability and patient comfort. High nanophase formulation holidays the final surface of the filler content creating a stronger and more esthetically pleasing bond with the restorative.
