INFECTION CONTROL

Pelton & Crane™
Your Image Reflected.
Pelton & Crane was founded by Dr. Richard M Pelton, a dentist who felt the need in his own practice for a furnace used to bake porcelain inlays. He called upon a friend, Mr. Ernest M Crane, who was an electrical engineer, to help him with the design and construction. Other dentists were impressed with the innovative new device and requested that they be permitted to buy one.

These events led to the birth in 1900 of the Pelton & Crane Company in the basement of Dr. Pelton’s home in Detroit, Michigan. This little company grew to the point where it was necessary for Dr. Pelton and Mr. Crane to give up their respective professions and devote their full time to the business of Pelton & Crane. Dr. Pelton and Mr. Crane always insisted on delivering the highest quality products and relevant innovation to the dental industry.

Today, over 115 years after its inception, Pelton & Crane still maintains Dr. Pelton’s dedication to quality and innovation.

**Our Portfolio**

We are proud to offer the broadest choice in operatory equipment solutions for every stage of your dental career. Our Pelton & Crane brand now offers entry-level operatory packages in addition to our more premium solutions. Whether you’re just getting started or building your dream practice, we have a fit for you.

**Our Promise**

At Pelton & Crane, we know that investing in new operatory equipment is a big decision. We are committed to your 100% satisfaction with our products. We back up our equipment with a focused team to help manage the manufacturing and installation process, ensuring it’s a seamless experience. If you’re not satisfied with your new purchase within the first 100 days, we’ll work with you to make sure you are. It’s that simple.

Pelton & Crane is proud to be part of KaVo Kerr, the premier dental solutions organization comprised of two global leaders. Combining 225 years of experience and innovation, KaVo and Kerr have joined forces to form a single company. We are excited to leverage this extended network to help dental professionals optimize their work and lives.
ACCESS DEFINES HEALTH

Access to the oral cavity defines health for the entire dental team. A wide back dental chair can prevent proper positioning which can result in Class 4 and 5 movements. When a patient is positioned incorrectly, the clinician has to bend at the lower back, and elevate and rotate their shoulders. Having the right equipment is a critical part of maintaining proper positioning. Pelton & Crane’s narrow chair back allows the clinician to gain access to the oral cavity while maintaining an ergonomically correct posture and staying within healthy motion ranges.

<table>
<thead>
<tr>
<th>Classification of Motion</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class 1</td>
<td>Fingers only</td>
</tr>
<tr>
<td>Class 2</td>

<td>Rotation of shoulders</td>
</tr>
<tr>
<td>Class 4</td>
<td>Elevation of shoulders*</td>
</tr>
<tr>
<td>Class 5</td>
<td>Bending and/or rotation of trunk*</td>
</tr>
</tbody>
</table>

Motions can be classified into five categories according to the length of the motion as shown above.* (damage begins)

Narrow chair backs and headrests allowed best clinician posture and access*

*Clinicians Report, February 2011, Volume 4, Issue 2

Pelton & Crane’s narrow chair back design enables oral cavity access in an ideal ergonomic position for you, while keeping your patients comfortably supported. Pelton & Crane reflects the quality of care that you strive to deliver.

The Narrow Back Advantage™

AVAILABLE AT ANY PRICE POINT

SPIRIT 3300

SPIRIT 1800

SPIRIT 1700
What is Reflective Technology?
The light from Helios is pointed at the continuous curve of the reflector lens, and shines back at the target area (the patient’s oral cavity).

Why does it matter?
Reflective technology means an ideal light pattern, reduced shadowing, and increased patient comfort.

Work around your patient, not your light

Benefits of Helios Reflective LED Lights

Light Pattern: With Helios LED dental lights, the operating field is illuminated from all angles. With direct technology, you are limited by the number of direct light beams shining at the target area. Instead of thousands there are 10, 12, etc. With Helios, obstructing part of the light path or moving the light has minimal effect on the pattern and usable light. Different story for direct technology: depth of field flexibility is limited. As you start to bring the light in closer, light beam separation is inevitable, as is color separation when the light is moved farther away. Calibration at 27” is key for any light, but that doesn’t mean every light is used at 27” for every patient, during every procedure, at every office. Count on Helios to let you work around your patient – not your light.

Shadow reduction: Reflective technology also means minimal shadowing. Place handpieces and instruments wherever you need them in the oral cavity – there will be minimal shadowing thanks to the reflected light of Helios. The story for direct LED lighting is different - when the light path is obstructed, shadows are more apparent, potentially obscuring visibility in other areas of the oral cavity. Reduce your risk of shadows with the reflective technology of Helios.

Patient comfort: Your patient is never looking directly into your operatory light source with Helios, as light is always reflected. Combined with a crisp, consistent 3”x6” light pattern that focuses only where you need it to (on the oral cavity), feel confident that patient comfort is maximized.

Helios Reflective LED Technology

Helios Reflective Lightings
Reflected light for a uniform light field – instruments can be placed where needed with minimal shadow effect.

Typical Direct Lighting
Limited amount of light beams – instruments intercepting these beams can create more shadowing.
Flexible CABINETRY SOLUTIONS

With over 115 years of industry history, Pelton & Crane approaches cabinetry with a wealth of experience and a spirit of innovation. Choose from these various product lines based on your specific needs.

The Renaissance Collection boasts a revolutionary aesthetic and is designed to improve operatory ergonomics.

Centennial 2 cabinets offer the widest range of rear cabinetry modular options allowing a truly customizable cabinet.

Essential features and functionality at a budget-friendly price point for dentists are offered in our Caseworx Millennium Cabinets.

Design GALLERY

Design the office of your dreams online or on your iPad. Choose from a variety of laminates, countertop options, and upholstery colors. Then email yourself the design.

Visit the Pelton & Crane Design Gallery at: www.pelton.net/dental-office-design/design-center or search “Pelton & Crane” in Apple’s App Store and install on your iPad.

INNOVATIVE STORAGE SOLUTIONS

Ample storage options are available to ensure enhanced workflow in your operatory.

TECHNOLOGY READY

Numerous electrical, USB, and air/water connections are located exactly where you need them to improve in-procedure ergonomics and technology access.
You work hard, let it show with the premium product offering from Pelton & Crane. Ergonomic design, exceptional patient comfort, and a beautiful aesthetic make the Premier series enable a true reflection of your success.
Pelton & Crane’s years of experience and innovation at its best.

The Spirit 3300 builds on a strong foundation to provide new enhancements in doctor access, patient comfort, and aesthetic appeal.

The narrow backrest, coupled with the new ability for the chair to go lower to the ground, enables ideal oral cavity access for practitioners of any stature, in a comfortable ergonomic position. A new base design makes it easy for patients to enter and exit, and provides enhanced stool access alongside the chair. Dual touchpads with new one-touch programming simplify chair operation, minimizing unnecessary movement for you and your team.

Pelton & Crane’s Spirit stools provide operator comfort while enhancing effectiveness. Enjoy support and style while treating each patient throughout the day. Various colors and finishes allow you to select dentist and assistant stools that complement each operatory design aesthetic.
The Spirit 3000 Series Delivery System from Pelton & Crane is your complete delivery solution. Seamless integration of premium accessories make Spirit 3000 a unit that grows with your practice. Ergonomically designed, Spirit 3000’s centralized handle and pivot ability provide ideal positioning for every procedure. Smooth surfaces and minimal seams make asepsis simple, while demonstrating a modern aesthetic style.

**KaVo ELECTROtorque TLC**

The ELECTROtorque TLC with KL703 short motor elevates the brushless electric motor system to a new level: your all-in-one handpiece solution! Combine the benefits of a brushless electric motor system with two handpieces for all of your high-speed, low-speed, and torque-control endodontic needs. All attachments offer smooth, precise, vibration-free operation with light, water spray, and pre-programmable speed settings.

**KaVo AIR DRIVEN HANDPIECES**

More American dentists select KaVo cellular optic high and low-speed handpieces than any other brand. The KaVo Collections includes a full range of air driven handpieces that will exceed your expectations, yet meet the needs of your budget.

**KaVo INTEGRATION**

The Spirit 3800 Delivery System is designed primarily for practices that prefer rear delivery. However, the Spirit 3800’s unique design also allows practitioners to work from a side delivery position, even though the unit is mounted to a 12 o’clock cabinet!
NO-CURE SETTING

Introduced in 2008, the Helios 3000 changed the game in operatory lighting. Using patented color mixing LED technology, Helios 3000 is the most significant breakthrough in dental operatory lighting in 40 years.

The ability to control color output allows the Helios 3000 to eliminate all blue light from the color spectrum while maintaining 15,000 LUX intensity. Never dim or move your operatory lights when working with composites or bonding agents again.

PATENTED COLOR MIXING

Forget about shade matching at the window. Using a combination of multi-colored LEDs (red, green, blue and amber), Helios 3000’s color temperature can be touch-button controlled to produce both 5000°K and 4200°K settings.

CONFIGURATIONS

Designed to accommodate any dental operatory, the HELIOS 3000 & 1800 are available in seven mounting variations:

1. CABINET
2. CEILING
3. WALL
4. ELLIPSE
5. TRACK
6. PMU
7. POST MOUNT

No-Cure settings: 5000° K, 4200° K, NO-CURE

RANGE OF MOTION

Horizontal, Vertical, 3D, Vertical Adjustment

(with Flexible Monitor Mount)
Beneath the sleek appearance lies intelligent design. Pelton & Crane’s experience as a comprehensive dental equipment manufacturer, and close collaboration with dental professionals, provide clever options to enable performance.

**SMART OPTIONS**

1. Brilliant LED counter top lighting
2. Rear cabinet pocket doors*
3. Sliding/pivoting monitor and keyboard mount*
4. Full sized CPU storage
5. USB connections
6. Numerous electrical connections
7. Storage on inside of rear cabinet doors
8. Cabinette Lazy Susan system*
9. Ergo Drawer system*
10. Barrier storage module*
11. Drawer inserts
12. Integrated Nitrous Oxide/Rubber Goods storage
13. Large, accessible countertop space

*Patents Pending

Pelton & Crane’s Renaissance™ collection of dental cabinetry showcases a unique aesthetic while enhancing efficiency and technology integration. Created in close collaboration with dentists, dental assistants and hygienists, a host of innovative features improve in-procedure movements, enhance access to technology and optimize storage space. Maximize productivity while creating a relaxing environment for patients and staff.

**RENAISSANCE™**

**Unique AESTHETIC**

RENAISSANCE RF42
Rear 12 O’Clock Cabinet
The Advantage series of dental equipment allows you to tailor your operatory to suit your individual needs. Modular cabinetry solutions, ergonomic and comfortable seating, and reflective LED technology create an efficient environment for the dental team.
Efficient design and durability come together in the Spirit 1800 dental chair.

The Spirit 1800 provides essential features to enable patient comfort and oral cavity access. Get the functionality you need at a budget friendly price point. With standard features such as a dual articulating headrest, swivel lock, wide toeboard and narrow backrest, the Spirit 1800 dental chair provides you with the core advantages of an attractive, durable and functional patient chair from a brand you trust.

SPIRIT 1800 CHAIR

Pelton & Crane’s Spirit stools provide operator comfort while enhancing effectiveness. Enjoy support and style while treating each patient throughout the day. Various colors and finishes allow you to select dentist and assistant stools that complement each operatory design aesthetic.
High-performance, durable delivery solutions.

Spirit 2000 delivery systems provide the performance and durability that is critical to your busy practice. Five standard positions let you incorporate a syringe and up to four additional instruments.

A die-cast metal control head will stand the test of time, and minimal seams make asepsis simple. Various configuration options are tailored to your specific delivery preference.

FLEXIBLE WORKSTATIONS

Spirit 2800 and 2500 rear delivery units provide the space and flexibility to maximize your efficiency. A contoured work surface is designed for ergonomics - smart contours eliminate discomfort while allowing better operator positioning, and in-procedure supplies are easily within reach. The height-adjustable Spirit 2800 system lets you independently position work surface and doctor’s unit head right where you need them. The Spirit 2500 provides precise positioning for the doctor’s unit with control head tilt, coupled with vertical and horizontal adjustment ability. Easily pivot doctor and assistant controls for simple right to left-hand delivery.

Pelton & Crane’s Helios 1800 operatory light leverages reflective LED technology to provide increased performance from traditional halogen lighting.

LONG LIFESPAN

Helios 1800’s LED lifespan is a minimum of 12-15 years on average (~30,000 hours), vs. the typical 1-2 years for halogen bulbs.

MAXIMUM EFFICIENCY

Expect a minimum 70% energy savings when moving from halogen to LED with the Helios 1800. Additionally, cool operation means no burns or ambient heating.

PRECISE LIGHT PATTERN

The Helios 1800 has a crisp, consistent 3 x 6” light pattern that focuses only where you need it and stays out of the patient’s eyes.

Centennial 2 dental cabinets provide several variations of rear delivery treatment centers, enabling users to select the right dental cabinet for their specific practice. Offering a unique system of customizable modules, Centennial 2 cabinetry can be tailored for specific functions within your work environment. The sleek design of Centennial 2 cabinets creates an aesthetic certain to suit any style.

**CENTENNIAL 2™**

**Flexible MODULAR EFFICIENCY**

**BEAUTIFUL**
Contoured, radius corners and a seamless back panel provide modern aesthetics to the operatory.

**DURABLE**
Full length Steelsides™ steel columns provide the ultimate in cabinet strength and durability. Metal sub base is pre-treated with a rust inhibitor and then painted with a scratch resistant powder coat paint.

**FLEXIBLE**
Midsection modules can be built in almost any configuration to fit any doctor’s specific needs. Later, as needs change, modules can be easily replaced with a different configuration.

**SERVICEABLE**
Unique side panels are hinged for easy access to utilities or CPU. Steelsides™ columns also provide a convenient utility chase. Cabinets are pre-wired for ease of installation.

Why choose Caseworx rather than local custom cabinetry?

Features like removable toe kicks facilitate under the module wiring of today’s or future technology. Serialized modules save you money by allowing the tax advantage of depreciation over a shorter term. And, should you decide to move or change your office, Caseworx can relocate with you.

Whether you’re designing a new sterilization center or updating an established treatment room, Caseworx modular cabinets are engineered for efficient use of space, flexibility in design and lifelong durability.
Making an economical choice in outfitting your operatory doesn’t mean sacrificing quality, comfort or the latest technology. Achieve your dream today with the same quality and comfort you have come to expect from Pelton & Crane.
The Spirit 1700 dental chair combines innovative technology with quality components resulting in an easy to use, durable dental chair. Standard features such as embossed membrane touchpads for the doctor and assistant, a dual articular headrest and swing away armrests coupled with the Spirit 1700’s powerful hydraulic lift mechanism provide a quality seating experience.

The Spirit 1700 dental chair allows integration of today’s technology at a budget-friendly price point.

Pelton & Crane’s Spirit stools provide operator comfort while enhancing effectiveness. Enjoy support and style while treating each patient throughout the day. Various colors and finishes allow you to select dentist and assistant stools that complement each operatory design aesthetic.
Pelton & Crane’s Spirit 1500 delivery system will serve as your platform to perform efficient dentistry at a budget-friendly price. From the push-button pneumatic air brake, to the durable all-metal control head, you can feel the quality in every element of the Spirit 1500. With standard features such as the self-contained water system with city water / bottled water selector, non-retracting water coolant adjustments, and four instrument positions (optional fifth), the Spirit 1500 delivery system provides the functionality, reliability and efficiency you need.

Pelton & Crane’s Helios 1800 operatory light leverages reflective LED technology to provide increased performance from traditional halogen lighting.

**LONG LIFESPAN**

Pelton Caseworx Millennium cabinetry series consists of a wall mounted 46" wide rear cabinet with ample counterspace and storage. The series also includes a 30" and 50" wide side cabinet options. Caseworx Millennium provides the simplicity, functionality, and value you demand.
Essential technology combined with quality components are designed with you and your patient in mind in the Pelton & Crane Alliance package.
The Alliance series delivery unit combines essential technology with quality components resulting in an efficient delivery unit.

STANDARD FEATURES
- Quick Clean Syringe and Straight asepsis tubing for three handpieces
- Convenient brake release for flex arm
- Individual non-retracting water coolant adjustments
- Handpiece tubing purge system
- Self-contained water system with city water/bottled water selector
- Post-mount utility center with solids collector
- Contoured junction box
- Assistant’s instrumentation included on a telescoping arm
- HVE, SE, and QC syringe come as standard assistant’s package
- Optional cuspidor available

Introducing the ALLIANCE DELIVERY

SPIRIT 1706 CHAIR

Pelton & Crane’s Spirit stools provide operator comfort while enhancing effectiveness. Enjoy support and style while treating each patient throughout the day. Various colors and finishes allow you to select dentist and assistant stools that complement each operatory design aesthetic.
Pelton & Crane’s NEW Solaris 2 Sterilization Center is built on a strong foundation of quality manufacturing. The Solaris 2 brings together a modern design combined with advanced function. Our research has shown that functional sterilization centers have three essential features: smooth workflow, enough storage space and reduced risk of cross-contamination.

**STREAMLINE THE PROCESS OF STERILIZATION**

When Pelton & Crane designed the Solaris 2 Sterilization Center, the goal was to do more than create a better product. Our objective was to streamline the process of dental sterilization from start to finish by making it easier, safer, and less time consuming.

**12’ — SOLARIS 2**

SOLARIS 2™

Sterilization

**MADE SIMPLE**

**ZONE 1**
Receiving and Decontamination

**ZONE 2**
Preparation and Packaging

**ZONE 3**
Sterilization

**ZONE 4**
Sterile Storage

**TOUCH-TO-OPEN WASTE DRAWER**

Featuring Grasse™ Sensomatic Electronic Assisted Opening System for waste drawers.

**TEMPERED GLASS DIVIDER**

In accordance with CDC guidelines, the Solaris 2 features an etched tempered glass divider separating the decontamination area.

**VACUUM-ASSISTED RESERVOIR**

A unique vacuum-assisted reservoir drain eliminates the use of buckets and maintains a clean process for the disposal of sterilization waste.

**ADJUSTABLE WIRE BASKETS**

Wire baskets accommodate all varieties of cassettes and packs while interior blue lighting provides easy identification of sterile cassettes.
SOLARIS 2 STANDARD FEATURES:

1. Soft close doors and drawers
2. Electronic assist waste module
3. Electrical with GFCI and air quick disconnect
4. Frosted tempered glass divider panel
5. Sensored illumination control
6. Single under-mount stainless steel sink
7. VistaPure™ module with VistaPure, system and storage tank
8. VistaClear™, faucet
9. Countertop mounted HVE
10. Chrome sensor faucet with pull-out spray feature
11. Aluminum framed frosted glass doors in contaminated and sterile storage modules
12. Water resistant MDF board in sink, VistaPure™ and Steritower modules
13. Above sink glove and towel dispenser
14. Wood shelves, up to 3 per module in uppers
15. New drop edge countertop bull-nose
16. Wide variety of standard Wilsonart and Nevamar laminate selections
17. Wide variety of standard Wilsonart solid surface countertop options
18. Artect-fusion bond technology edgeband for superior adhesion and bond

UPGRADES AND OPTIONS:

A. Recessed Ultrasonic Module
B. Counter trash drop
C. Non-motorized trash module (door)
D. Top-mount stainless steel double sink
E. Non-sensored chrome pull down faucet
F. Tapmaster™
G. Wood divider panel
H. Glass door upper options for all upper storage
I. Upper bi-fold door lift system
J. Two tone laminate color scheme
K. Quartz countertop
VistaPure is a standard feature on all Solaris sterilization centers and includes a tank for storing treated water, unique wand for dispensing water into autoclaves and separate faucet for filling bottles. It can also be purchased separately and retrofit into existing cabinetry.

Our mission at Vista Research Group is solving water problems for the dental industry. With over 30 years of experience, we’ve been able to create efficient, proprietary technology that works.

The Modern Marvels® award winning VistaClear system can provide you with a worry-free solution for cleaner dental waterlines, without the use of independent bottles. VistaClear and VistaPure systems are becoming “standard equipment” in new dental offices. You’ll save money and staff time since there’s no more water to buy, store or pour. With Vista Research Group and Pelton & Crane you have choices, guaranteed products and continued support.

VistaClear™ features proprietary filter elements that boast submicron-level performance. With such effective filtration and the lack of harmful chemicals, VistaClear™ helps protect your expensive handpieces and turbines from the wear and tear typical water supplies can inflict. Additionally, VistaClear™ will help reduce other contamination found in most city water supplies.

VistaPure provides a convenient and inexpensive supply of high purity, distilled-quality water for labs, dental and medical offices - up to 25 gallons per day! The system produces two grades of water — distilled-quality water for filling autoclaves and ultra filtered, non-corrosive water for bottles used with dental delivery systems.
