Make restorations a Breeze

Get to know the new Breeze RMGI with high bond strength to Zirconia, PFM and Metal crowns.

Breeze™ RMGI
Resin Modified Glass Ionomer Cement

Dispense. Cure. Go.

When you need an RMGI that delivers a durable and lasting bond with ease and versatility, the new Breeze RMGI from Pentron will be ready for you. From its moisture tolerance and continuous fluoride release, to its dual cure options and beyond effortless cleanup, so much went into this new luting cement so you can get more out of it.

See how Breeze RMGI Luting Cement stacks up against the competition

An RMGI that holds its ground

Recommended indications

- Inlays (all substrates)
- Onlays (all substrates)
- Posts
- Crowns (Zirconia, PFM, metal)

Set times

- Tack Cure: 3-seconds
- Self-cure: Working Time = 1:30 min
- Total Set Time = 4:30

Internal data on file

Indirect Bond Strength (Mpa)*

Highly Radiopaque
High radiopacity makes for greater transparency.

FLUORIDE FLOW
Continuous fluoride release designed to prevent secondary caries.

EASY TO USE
Auto-mix delivery makes it simple to handle for a streamlined routine.

DUAL CURE
Tack cure or self-cure options allow for more control over single or multiple crowns.

DUAL CURE

FEATURES & BENEFITS

3-CROWN COMPATIBILITY
High flexural and compressive strength for Zirconia, PFM and metal crowns.

QUICK CLEANUP
Tack cure for 2-3 seconds, then easily remove excess cement with one clean sweep.

LOW FILM THICKNESS
Low film thickness designed for a precise fit.

ENHANCED ESTHETICS
Prevents staining for ultimate color stability and ideal translucency.
