SURFACES IN DENTAL PRACTICES ARE AT A HIGHER RISK

Did You Know?
Organisms found on surfaces can survive longer than you may think.1

1 Protective Environmental Surface Barriers in Health Care. The Dental Advisor Number 29 - March 2016

1  Protective Environmental Surface Barriers in Health Care. The Dental Advisor Number 29 - March 2016

FOR USING BARRIER COVERS:

3 BARRIERS WERE TESTED
See how effective each barrier was at reducing microbial penetration of methicillin-resistant (MRSA) Staphylococcus Aureus

CANDIDA
1 day to 3 months

TUBERCULOSIS
3 day to 5 months

CLOSTRIDIUM DIFFICILE SPORES
1 month to 6 months

MRSA
1 day to 1 month

2 Effective Ways
TO REDUCE CROSS CONTAMINATION:

IMPERMEABLE BARRIER: Protects barrier area from contamination from passing through.

PERMEABLE BARRIER: Vials can leak through.

Not all Barriers ARE CREATED EQUAL

Single-use disposable barrier covers, rigid plastic equivalent, that covers into patient contact.

Disposable plastic cover for headrests.

Trash Bags

# Cure Sleeve™ & Vision Saver™

**Dental Cure Sleeve & Disposable Curing Shield**

The cure sleeve prevents composite from bonding to end of tip, which decreases curing depth. The Vision Saver protects doctor and staff from the damaging effects of the intense light.

Kerr TotalCare is proud to carry Cure Sleeves. By using our Dental Cure Sleeve, all professionals can safely contribute to infection control and creating a clean environment for patients.

# Bib-Eze™

**Disposable Bib Clips**

Bib-Eze Disposable Bib Holders are lightweight, stretchable paper holders that attach to the dental napkin bib with easy to peel, self-adhesive ends, which can easily be removed after the procedure and thrown away with the dirty napkin.

- Easy to use and helps reduce cross contamination
- Eliminate the cost of cleaning both in time and material
- Comfortable with no sharp edges or cold metals against patient’s neck
- Stretch to fit most patients
