Technical specifications.

Minimum System Requirements for Acquisition Computer

- Operating System: Windows 7, Windows Vista or Windows 10 Pro or Enterprise, 64-bit
- TWAIN interface: Optional
- DICOM* compatibility: Optional
- PC connection: 100Base-TX

Dimensions

- 92.1˝ (2340 cm)
- 6.9 - 8.5˝ (17.5 - 21.5 cm)
- Optional 88.6 ˝ (225 cm)
- Optional 34.5 - 65˝ (87.5 – 165 cm)
- 38.6˝ (98 cm)
- 32.7˝ (83 cm)
- 38  - 68.5˝ (96.5 - 174 cm)

Dental Excellence in every area.

Practice equipment

KaVo treatment units and lights, dental chairs, patient communication systems, dental microscopes and additional operator accessories.

Instruments

Dental straight and contra-angle handpieces, turbines, air polishing systems and small equipment for all application areas including diagnosis, prophylaxis, restorative, surgery, endodontics and instrument care.

Imaging

Intraoral X-ray equipment, sensors and imaging plate systems, panoramic and cephalometric in combination with CBCT, as well as dedicated CBCT devices for every indication in dentistry.

CAD/CAM

KaVo Dental CAD/CAM solutions for premium aesthetic, natural-looking and long-lasting restorative work, suitable for dentists and dental technicians.

Dimensions

- 100 x 220 x 253 cm
- 70 x 90 x 30 cm

A success story: KaVo ORTHOPANTOMOGRAPH™ OP 2D.

The KaVo OP 2D offers an excellent point of entry for the ORTHOPANTOMOGRAPH™ family, known worldwide for impressive image quality. Since 1961, the letters “OP” have stood for premium panoramic X-ray devices, precision and reliability. An installed base of more than 60,000 systems* is the ultimate testament to this success.

Your benefits at a glance:
- Premium panoramic X-ray device with V-Shape-Beam Technology for optimised image quality
- High-end system technology producing clear, homogeneous images for complete, daily diagnostics
- Intuitive operation using a touchscreen with self-explanatory symbols
- Stable 5-point patient positioning for less movement artefacts

An investment with a future.
The KaVo OP 2D is the point of entry for the KaVo world of panoramic X-rays, enables you to optimise treatment results for your patients, ensuring the highest safety levels and therefore securing sustainable investment security.

A new dimension of efficiency.
The KaVo OP 2D offers excellent image quality thanks to its V-Shape-Beam Technology, four essential panoramic programs including the possibility of segmented panoramic imaging, various options for manual fine adjustment and much more. At the same time, simple presets and the option to choose patient size directly using four selection buttons ensure an even swifter workflow in the practice.

* The 60,000 devices also include the ORTHOPANTOMOGRAPH™ from Instrumentarium Dental, the predecessor to the KaVo OP 2D.
X-rays: digital.
Diagnosis: ingenious.

The KaVo OP 2D was developed for dental practices and smaller X-ray centres that require an efficient and highly precise, digital panoramic system. The KaVo OP 2D is part of the exceptional ORTHOPANTOMOGRAPH™ family and can be easily integrated into the workflow of your practice.

The excellent image quality is the result of many ingenious functions, innovative technical features and a simple patient positioning. All this enables you to rely on the KaVo OP 2D for outstanding diagnosis:

- Stable 5-point patient positioning
- Optimal imaging geometry
- Adjustable anterior layer position with 3 positioning lights
- Powerful high-frequency X-ray tubehead design
- High resolution CCD imaging sensor
- V-shaped collimation optimizes image quality
- Versatile software tools to enhance diagnostic capabilities

A V-shaped beam better considers the different absorption of the human anatomy than a standard beam, thus ensuring a homogeneous image presentation. As a result, the structures of the upper jaw are better penetrated and the sharp layer in the lower jaw is significantly broader.

Homogeneous image presentation thanks to V-Shape-Beam Technology.

The standard panoramic imaging program provides clear definition of the dental anatomy including TMJs – in only 10 seconds.

The paediatric panoramic imaging program for children shows a horizontally reduced image field.

Lateral view from temporomandibular joint area with mouth closed or open.

Special program for bitewing-like illustration with specific segmentation and collimation.

Imaging of the sharp layer.
**From easy to simply self-explanatory.**
Operated via intuitive user-interface.

The 5.7 inch touch panel with its elegant, clearly structured user-interface supports simple and safe application. Owing to the graphical concept, all settings are self-explanatory so that your KaVo OP 2D can be operated intuitively from the onset.

**5-point patient positioning for less movement artefacts.**

Intuitive 5-point patient positioning system holds the patient still during the imaging procedure to reduce movement artefacts. Three laser positioning lights make positioning accurate. The sharp layer is easily adjustable for every patient.

**Your software: already installed.**
**The future: DTX Studio™, fully integrated.**

The 2D X-ray software you need will be installed during OP 2D operational start-up. The new, unifying software platform DTX Studio™* will integrate the existing software solutions.

With DTX Studio™ a new software platform is available to you, designed as an end-to-end workflow system. With a constant stream of new enhancements, DTX Studio™ will cover all fields of modern dentistry and dental technology in the future. DTX Studio™ is compatible with Mac and Windows operating systems. It will integrate both existing and future devices of multiple brands as well as current software provisions into one unified working process.

With segmented panoramic program the desired areas can be selected so the radiation dose is adapted to the symptom.

In Manual mode, the kV/mA values can be set separately so as to achieve maximum performance.

The secure 5-point positioning system with chin rest, bite block and head rest with forehead and temple points prevents patient movement.

**CLINIVIEW.**
2D X-ray software.

**DTX Studio™.**
Consistent workflow.

* Installations possible as soon as DTX Studio™ is available in your region.
