The most commonly used disinfectants are EPA registered wipes, ready-to-use spray and concentrated liquids.

There are four key features healthcare providers should consider when choosing a proper surface disinfectant:

1. **CONTACT TIME**
2. **BROAD-SPECTRUM PATHOGEN CLAIMS**
3. **CLEANING PROPERTIES**
4. **MATERIAL COMPATIBILITY**

The CaviCide™ and CaviWipes™ brands are designed for reducing cross-contamination in the healthcare community. Trust the surface disinfectant brand used by thousands of healthcare facilities everyday.

**CaviWipes™ Bleach**
CaviWipes Bleach is made for hard non-porous surfaces. These new surface disinfectant cleaning wipes are gentle on surfaces, yet tough on pathogens.

- Meets the CDC recommended 1:10 bleach dilution
- No Personal Protective Equipment (PPE) required
- Kills all product labeled organisms in 3 minutes including C. dif /1, TB, drug resistant bacteria, viruses and fungi.
- Compatible with most medical device equipment
- One-step cleaner and disinfectant
- Low odor

**CaviWipes1™ & CaviCide1™**
CaviWipes1 and CaviCide1 are the only 1-minute low-alcohol disinfectants in the market. They are multi-purpose surface cleaners and disinfectants designed for every day use.

- 1-minute contact time for virucidal, bactericidal (including TB), and pathogenic fungi activity
- 1-step cleaner and disinfectant
- Fragrance free & Bleach free
- Multi-purpose cleaner for every day use

**CaviWipes™ & CaviCide™**
CaviWipes and CaviCide are intermediate level disinfectants recommended for use on hard, non-porous surfaces in healthcare settings.

- Effective against TB and MRSA in 3 minutes
- Effective against HIV-1, HBV, and HCV in 2 minutes
- All in 1 cleaner and disinfectant
- Available in multiple configurations to meet your needs
