SPIRIT 1706
Narrow back design without slings
Optional accessories shown
The 1700 chair offers a wide variety of upholstery options, including wide and narrow back, slings, colors, and exciting upholstery upgrades. The Plush Upholstery Upgrade includes Ultraleather and memory foam for a comfortable patient experience.

The Helios 1800 Light Series offers unique benefits like long LED lifespan, which means no more downtime or cost associated with bulb outages. Additionally, cool operation eliminates the risk of potential burns and uncomfortable ambient heat for you, your staff, and your patients. Reflective technology lets you focus on your patient: position yourself and your instruments where you need to, as the reflected light of Helios minimizes shadowing.

The Spirit 1700 chair compliments the Narrow Back Advantage. The chair's narrow back rest allows the clinician to reach the optimal ergonomic position, and enables the doctor to work around the chair, not trapped underneath it.
The new Alliance delivery system is designed with you and your patient in mind. For more information, call 1.800.659.6560.
