Correct Plus® Hydrophilic Impression Materials

The road to a perfect impression starts here - you choose how long it takes to get there.

This extensive line of hydrophilic impression material is available in a variety of viscosities with 2 set times: Standard and Fast Set. Correct Plus Impression Materials are designed to consistently provide highly accurate and detailed impressions every time you use them. Its versatile setting times, multiple viscosities, and choice of 50ml auto-mix cartridges or 380ml Mighty Mix™ cartridges designed for automated dispensing machines make Correct Plus Impression Material the perfect choice for fabricating crowns, bridges, inlays, onlays, veneers, and more.

- Low contact angle of ≈30° for accurate, reliable impressions in a wet or dry environment
- Choice of work/set times for single unit to full arch impressions
- Outstanding tear strength ensures reliable impressions
- Minimized outgassing time for immediate pour of models
- Unique viscosities including Thick’n Thin™ Light Body and Auto-Mix Putty
- Choice of 50ml auto-mix cartridges or 380ml Mighty-Mix Cartridges
- Reduced hand fatigue and time to fill the tray

Correct Plus® Hydrophilic Impression Material

Correct Plus Hydrophilic Impression Material is a versatile impression material designed to accommodate all impression techniques. A low contact angle of ≈30° guarantees outstanding detail in the presence of fluids. Exceptional tear strength ensures your detailed impression will remain intact upon removal. With a working time of 1 minute and 30 seconds and an oral setting time of 3 minutes and 30 seconds, Correct Plus is the ideal material for full arch impressions or any situation where a longer set time is desired. For optimal patient acceptance, Correct Plus Impression Material is available in unflavored and Berry.

<table>
<thead>
<tr>
<th>Viscosity</th>
<th>Description</th>
<th>Indication*</th>
<th>Set Times</th>
<th>Color</th>
<th>Delivery Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thick’n Thin Light Body</td>
<td>A unique, therapeutic light viscosity material that initially sticks on the tooth when syringed then flows into the sulcus to capture critical subgingival detail.</td>
<td>W</td>
<td>Standard &amp; Fast Set</td>
<td>1:1</td>
<td></td>
</tr>
<tr>
<td>Light Body</td>
<td>A traditional light viscosity wash material with exceptional flowability.</td>
<td>W</td>
<td>Standard</td>
<td>1:1</td>
<td></td>
</tr>
<tr>
<td>Universal Body</td>
<td>Truly an all-purpose impression material. Use it as a tray material and/or a light body. A perfect substitute for alginate for night guards, bleaching trays, or any other impression procedure.</td>
<td>W &amp; C</td>
<td>Standard &amp; Fast Set</td>
<td>1:1, 5:1</td>
<td></td>
</tr>
<tr>
<td>Auto-Mix Putty</td>
<td>A heavy viscosity material that provides the hydraulic drive of a hand-mix putty in a convenient auto-mix cartridge.</td>
<td>Q, FA, TIO</td>
<td>Standard &amp; Fast Set</td>
<td>1:1, 5:1</td>
<td></td>
</tr>
<tr>
<td>Tray Material</td>
<td>A heavy viscosity material with a mousse-like consistency and high end hardness.</td>
<td>Q, FA, TIO</td>
<td>Standard</td>
<td>1:1, 5:1</td>
<td></td>
</tr>
<tr>
<td>Putty</td>
<td>An easy-to-mix, heavy viscosity putty with a high end hardness to resist distortion and provide maximum hydraulic drive of the light body material.</td>
<td>Q &amp; FA</td>
<td>Standard</td>
<td>Hand Idle</td>
<td></td>
</tr>
<tr>
<td>Bite Superfast Material</td>
<td>A superfast setting bite registration material with a mousse-like viscosity. When set, its rigidity facilitates trimming.</td>
<td>Bite Registration</td>
<td>Fast Set</td>
<td>1:1</td>
