TECHNICAL SPECIFICATIONS

Frame
Frame and cross members are fabricated from 1/8” O.D. by 16-gauge tubular steel. All joints are welded. Chairs are available in (17 3/4” seat height) or cafe stool (28 3/8” seat height). Chair stacks 38 high on dolly (10 on floor). Stool stacks 30 high on dolly (8 on floor).

Seat and Back
Seat and back are available in four combinations of mesh or polypropylene backs and mesh or polypropylene seats. Mesh material is made from 100% post-consumer PET bottles. All resin parts (back and seat) are 100% recycled polypropylene.

Glides
Frames are available with either nylon, steel or PVC/non-skid glides. Nylon glides are available with or without integral ganging clips. Nylon glides are Stone Grey. PVC/non-skid glides are Black. Steel glides have a stainless steel cap that fits over a non-ganging nylon glide. All glides are attached with one screw.

Frames and Finishes
Frames are finished in either baked-on electrostatically-applied powder-coat paint or bright nickel-chrome plating.

Transport Dolly
Powder-coated tubular steel frame. Two swivel casters and two fixed casters.
