How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

To expedite the procedure, attach a copy of the “C.O.M. Information Form” on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

For products shipped from Bonduel, WI facility:

KI
Attn: C.O.M. Storage
284 West South Street
Bonduel, WI 54107

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

For products shipped from Ontario, CA facility, ship material to:

KI
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

For products shipped from Tupelo, MS facility, ship upholstery material to:

KI Tupelo
Attn: C.O.M. Storage
2112 South Green Street
Tupelo, MS 38801

C.O.M., C.O.L and C.O.V. Production

Customers’ fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1’ square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer’s own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Purchase Order Number

Please see information below and check the appropriate box.

□ Submitted for testing.
□ Test approved. Submitted for production.

KI Acknowledgement Number

In all instances, send this form to the C.O.M. Specialist.

□ A Selvage Top and Bottom
□ B Selvage Side and Side

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.V. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer’s responsibility to arrange for return of this material.

Custom Color Matching Requirements

KI Custom Poly Color Matching Program

Whatever you imagine, whatever you require, KI’s custom color-matching program lets you pick your color. Match an organization’s brand colors. Match fabrics. Match surface materials. The choice is yours.

Custom Color Matching Requirements

- **Pantone Number or Color Samples.** To ensure we match your color exactly, we require either a Pantone color number or two color samples (chip, swatch, or paint sample). We do request that the size be substantial enough to allow for us to retain for our internal matching process (minimum 2.5” x 3.5”).

- **Extended Lead Time.** Using the unique combinations of specialty bases and pigments, our Custom Color Matching and Manufacturing processes do add time to your production schedule.
  - The color match process (see steps below) on average will take 2-3 weeks to produce a match sample for your review and gain your written approval to proceed. *Starting this during the quoting process is encouraged to reduce overall lead time.*
  - Orders with custom colors will typically reflect standard lead time plus 15 additional days to source the appropriate raw materials and run the custom order.

- **Minimum Quantity.** No additional set-up fee is incurred if the quantity (per color, product line, and order) is 100 or more. A $500 set-up fee (per color, product line, and order) is applied if the quantity is 99 or less. You’ll see a “Custom Color Set-Up Charge” note appear on your Custom Options Quote until the order is placed and quantity is determined.

  Note: The Doni Seating Collection, with its two-tone color capabilities, would require a single $500 set-up fee if one or both colors are custom. In addition, please note that reversing the inner/outer colors of Doni’s two-tone standard color combinations would also be considered custom.

Custom Color Matching Process

When your purchase order is submitted, it is simply placed on hold until the color match is finalized. As soon as we receive your Pantone number or custom color samples, the process for color matching begins.

*Note: If the project requires a compressed manufacturing/shipping schedule, KI encourages you to process the color match during the quotation stage. This will accelerate the purchase order release into production.*

**Step 1.** Provide the Pantone color number to KI Customer Service by calling Customer Service at 1-800-424-2432 or emailing us at SalesOps@ki.com. Custom color samples can be mailed to KI at:

KI Customer Service (Provide specific contact name if known)
Attn: Custom Color Match Required (Please reference the PO# or Project Name)
1330 Bellevue Street
Green Bay, WI 54302

*In the event the color requested is a discontinued KI color or non-standard on the product requested, no color match is necessary (minimum quantities and extended lead time still apply). KI will use the custom options process to facilitate the quote/order.*

**Step 2.** KI begins the matching process which takes 5-10 days depending upon how quickly the exact color is matched, taking into account lighting, visual and spectrographic readings as compared to the originals.

**Step 3.** We then ship the color sample chip and a letter asking for you to sign the letter and fax it back to us within 24 to 48 hours.

**Step 4.** Upon receipt of your approval signature, we remove the hold status of your order and begin production, using standard production lead times plus 15 days.
### Specifications

#### Frame
Frame shall consist of 14-gauge, 1" O.D. steel tubing bent and welded to a 13-gauge steel stamped seat plate and finished with baked-on powder coated paint. The chair frame shall be topped by two aluminum die castings with a baked-on black powder coated paint finish. Castings support the chair seat and provide a means of rotation of the tablet about the seat.

#### Shell
Shell swivels a total of 55° (27.5° each way from center) for ease of entry and exist.

Doni Seat Shell and Backrest Articulation Mechanism
Backrest, seat, and shroud are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers, and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to move through 17 degrees of movement, about an axis through the hips of the occupant.

Doni Optional Upholstered Seat
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness.

Intellect Wave Shell
One-piece contoured shell made of high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength, textured front and back with a wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame by a 12-gauge formed steel plate with six torx head screws.

Optional upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the seat and fastened to an inner shell with screws.

Strive Shell
Injection molded polypropylene back with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire. Injection molded polypropylene seat shall be secured to the chair by a 12-gauge formed steel plate.

Optional upholstered seats have molded urethane foam attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Surface Support
The worksurface shall be supported from the chair frame by a formed and welded support tube made from 1.125 O.D. 14-gauge steel. The worksurface shall be supported from the support tube by an aluminum gusset die casting with a black powder coated paint finish. The support tube rotates around the chair seat a total of 220° (110° each way from front center). A 1/2" thick steel plug shall be drilled, tapped, and welded into the steel welded directly to the seat support structure and matching the seat and back color. The armcaps are injection molded glass filled polypropylene matching the seat and back color. The armcaps are attached to the steel structure by means of screws.

Strive Optional Upholstered Seat
Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

### C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54” sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI  
Attn: C.O.M. Specialist  
1441 Ontario Street  
Green Bay, WI 54311

### Design

Strive is designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

**TRANSLUCENT colors are available on the upholstered seat models only.**

Armcaps and glides match the frame color with the following exceptions below:

- When frame color is chrome, metallic, or hammertone, the armcaps and glides will match poly color.
- When frame color is chrome, metallic, or hammertone, and the poly color is translucent diamond, the armcaps will be light tone.
- When frame color is chrome, metallic, or hammertone, and the poly color is translucent pewter, the armcaps will be flannel.
- When frame color is chrome, metallic, or hammertone, and the poly color is translucent bronze, the armcaps will be chocolate.

#### HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

- **Note:**
  - □ indicates that a choice is required.
  - The absence of the □ indicates that no choice is required.
  - Alpha-numeric characters in place of □ indicate that no other alternatives are available.

---

#### HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select worksurface type.
- LW - Laminate worksurface; add $49
- PW - Plastic worksurface

**C** Select frame color. Refer to the **Product Color Options** page in this price list.

**D** Select fire code.
- NFR - Compliance to TB 117-2013
- FR - Compliance to TB 133

**E** Select solid poly color. Refer to the **Product Color Options** page in this price list.

**F** Select outside/inside poly color. Refer to the **Product Color Options** page in this price list.

**G** Select surface finish. Refer to the **Product Color Options** page in this price list.

**H** Select caster/glide option.
- C - Carpet casters
- S - Hard floor casters
- UL - Tufpeld
- SCU - Front hard floor casters, rear glides
- CCG - Front carpet casters, rear glides

**I** Select upholstery grade/color. Refer to [ki.com/fabrics](http://ki.com/fabrics)
