Classroom Furniture
ingenious comfort | exceptional durability | inspiring colors
Passive flexing back offers ergonomic comfort.

Wider back provides greater support.

Integral handle enables easy movement.
A recent study conducted at Georgetown University showed a 10.9% increase in standardized achievement scores when learning environments went from “poor” to “excellent”. Better comfort results in improved student concentration. As students continue their education from grade to grade, Intellect Wave seating with its passive flexing back becomes a familiar and comfortable learning tool.

durability

that passes every test

Engineered to withstand tough classroom use, Wave exceeds industry standards for durability. Elliptical tubing provides superior frame strength. Lightweight, textured poly shells resist scratching, fading, chipping and denting. Hard plastic or laminate tops provide the most durable worksurfaces. The result is classroom furniture that gives years of low-maintenance service. It’s made in the USA and backed by KI’s 15-year warranty.

Sitting all day every day is not good for us. It can contribute to obesity, hypertension, and various serious health risks.

Standing can increase circulation, improve mental clarity and burn more calories. However, prolonged standing isn’t the answer to too much sitting as it comes with its own human health risks, including circulatory issues and musculoskeletal aches and pains.

Learning and work environments should not be static, or non-moving. The ability to dramatically change one’s postures (from sit to stand to sit) should reduce tension and stress, and improve productivity and efficiency.

How to stay healthy at a sit-stand workstation:

- Remember to alternate postures. Use a timer if it is hard to remember when to change.
- Sit for 1-2 hours, then transition to standing for 1-2 hours; repeat throughout the day.
- Understand ideal keyboard and mouse height, along with position of your monitor. The monitor height will likely need to be re-adjusted when moving between positions.
- Pay attention to how your body is responding, particularly your feet and back, adjust accordingly.
- Consider a standing-height worksurface with an accompanying stool-height task chair. This will allow you to alternate between sitting and standing without adjusting your worksurface.
