Assemble units as described herein only. To do otherwise may result in instability. All screws, nuts and bolts must be tightened securely and must be checked periodically after assembly. Failure to assemble properly, or to secure parts may result in assembly failure and personal injury.

**Cantilever Desk - Leg Height Adjustment**

1. Carefully turn the desktop upside down on a soft, protective surface (Figure 1).

2. Locate and remove two height-adjust screw per leg using a 1/8" Allen wrench. Move the leg up or down to desired height and re-install the height-adjust screws into appropriate alignment holes (Figure 1).

3. Repeat procedure for second cantilever leg and carefully turn the desk to the upright position.

**Cantilever Sit/Stand Desk - Leg Assembly & Height Adjustment**

1. Carefully turn the desktop upside down on a soft, protective surface (Figure 2).

2. Locate and remove the height-adjust screws using a T30 Torx wrench. Move the legs up or down to desired height and re-install the height-adjust screws into appropriate alignment holes (Figure 2).

3. Footrest comes assembled, but can be adjusted forward or backwards by removing the four attachment screws using a T30 Torx wrench. Once footrest is positioned, re-install screws and tighten down to insure that it is secure (Detail A & B).

**IMPORTANT:**

- TO MAINTAIN THE STRUCTURAL INTEGRITY AND STABILITY OF THE DESK, THE FOOTREST MUST BE INSTALLED AT ALL TIMES.

**Operating/Care & Maintenance Instructions**

Intellect Wave® Classroom Furniture

Adjustable Height & Sit/Stand Height Cantilever Desks

October 2016
IMPORTANT: Please do not discard instructions. This document must be provided to the end user after installation.

General Cleaning
Proper care and careful use are the best methods of maintaining the appearance and finish of any product. For normal cleaning of poly shells, work surfaces, upholstery, and powder coated metal or chrome frames, use a soft cloth with mild soap and lukewarm water. Rinse thoroughly and dry with a soft cloth. Do not use solvents, citrus- or orange-based cleaners, heavy-duty kitchen cleaners (like Fantastic or 409), or any cleaners with bleach, including Clorox Wipes. For tough stains, spots or dirt accumulation, refer to the following recommendations:

Powder-Coated Metal or Chrome Frames
It is recommended that frames be kept dry and away from water, rain, ice, snow and salt. If additional cleaning is needed, use chrome polish on chrome frames. Once clean and dry, use a high-quality wax such as Johnson’s “Glo Coat” or “Simonize” to restore luster and protect the finish. Always follow the manufacturer’s directions.

Upholstery Fabric
Vacuum upholstery frequently and thoroughly. Use a foam-type cleaner such as Johnson Wax “Glory” or Earl Grissmer Co. “Blue Lustre” for general cleaning. For more stubborn spots and stains, use Texis Chemical Co.’s “K2r”. Always follow the manufacturer’s directions for spot testing and application.

CAUTION: Do not use a coarse cloth when applying cleaning agents to smooth surfaces.

CAUTION: Do not use dry cleaning agents on upholstery.

Textured Poly Shells
Sunnyside Plastic Cleaner is ideal for light cleaning and to restore luster to smooth surfaces. Its anti-static properties help repel dust and dirt. High-quality wax, such as Johnson’s “Glo Coat” or “Simonize”, restores luster and protects the finish. Always follow the manufacturer’s directions.

Worksurfaces - Laminate or Hard Plastic
To clean, use a soft cloth with mild soap and lukewarm water. Do not soak the surface. Always rinse thoroughly and dry the surface with a dry cloth. Never use harsh, abrasive cleaners; scrub pads; etc. to clean the surface.

CAUTION: Do not use solvents, citrus- or orange-based cleaners, heavy-duty kitchen cleaners (like Fantastic or 409), or any cleaners with bleach, including Clorox Wipes.
