(Fastening Systems catalog, pp. 79-81)

**COMPOSITE-DECKING Screws**

Composite materials demand a premium screw; Deck-Drive composite-decking screws are specifically designed for composite and are color matched to most major decking manufacturers.

**DCU COMPOSITE Screw**
All Types of Composite Decking
Available in 11 Quik Guard® colors; also available in Type 305 and Type 316 stainless steel, with and without painted heads
(Fastening Systems catalog, p. 89)

**DCSD COMPOSITE-TO-STEEL Screw**
Composite Decking to Steel Deck Framing
Available in 6 Quik Guard® colors
(Fastening Systems catalog, p. 266)

See strongtie.com/cmg for more deck board color-matching information.
Premium Solutions for Any Type of Decking
Superior performance for decking projects: Deck-Drive screws are designed with the most demanding deck builders in mind. Whether the project calls for wood decking, premium composite or exotic hardwoods, you can trust Deck-Drive screws to provide you peace of mind, protect your reputation and keep your customers smiling.
FASTENING Solutions
Sometimes you need a fastener that does more. Maybe you’re looking for higher loads or additional corrosion resistance, or perhaps an installation method that saves time on a repetitive application. Whatever it is, you’re no longer looking for just a fastener — what you’re really looking for is a solution.

When Performance Is Critical
Best-in-class, load-tested fasteners: Strong-Drive® structural fasteners are engineered and extensively tested to efficiently meet your most demanding wood and metal applications. Stronger can also be faster. The Strong-Drive family is designed to install easier than other fastening methods, which saves time and money.

The Ultimate Deck Screws
Superior performance for decking projects: Deck-Drive™ screws are designed with the most demanding deck builders in mind. Whether the project calls for wood decking, premium composite or exotic hardwoods, you can trust Deck-Drive screws to provide you peace of mind, protect your reputation and keep your customers smiling.

Time Saving by Design
Doing the job right doesn’t have to take more time: Quik Drive® is the fastest auto-feed screw driving system on the market, ensuring you’ll save maximum time during repetitive fastening applications. Rather than installing individual screws, or other more complicated fastening options, Quik Drive operators can work faster, in most cases from an ergonomic standing position. When time is money, Quik Drive is the faster fastener tool.

Unmatched Quality
Huge selection of stainless steel screws, nails and staples: When working in harsh environments, building professionals count on Simpson Strong-Tie for one of the largest selection of Type 316 stainless-steel fasteners on the market. Our unmatched selection of Type 316 stainless steel products, including many Strong-Drive and Deck-Drive fasteners, offers the highest level of corrosion resistance. When you need stainless, Simpson Strong-Tie is your convenient, one-stop source for fasteners that stand the test of time and the elements.
