1. Identification

Product Identification

Product Identifier: A Component FX-70-6MP™
Recommended Use: FX-70-6MP™ is a multi-purpose, three-component marine epoxy grout for underwater repair application as part of the FX-70® Structural Repair and Protection System.
Use Restrictions: For industrial use only. To ensure proper installation, use according to package directions. Complete application instructions can be found in Simpson Strong-Tie catalogs or online at strongtie.com.

Company Identification

Company: Simpson Strong-Tie Company Inc.
Address: 5956 W. Las Positas Blvd.
Pleasanton, CA  94588, USA
Phone: 1-800-999-5099
Website: www.strongtie.com
Emergency: 1-800-535-5053 (US/Canada)
1-352-323-3500 (International)

For most current SDS, please visit our website at www.strongtie.com/sds

2. Hazard Identification

General Information

FX-70-6MP™ is a 100% solids, three part system (2A:1B mix). It is high-strength epoxy grout repair mortar resistant to the chemical and physical strains of a marine environment. FX-70-6MP™ is moisture-tolerant and specifically designed for underwater applications as part of the FX-70® Structural Repair and Protection System. The three parts of this product have been individually assessed according to the Globally Harmonized System (GHS). The mixed product can be assumed to carry the hazards of each component until the product has been fully cured. The final cured product will be dark tan in color and can be considered nonhazardous. This Safety Data Sheet covers hazards and responses for Component A. See Component B and Component C Safety Data Sheets for complete product information. The product should be mixed thoroughly with a low speed drill. CAUTION: Product mixing may produce heat, wear appropriate personal protective equipment and handle mixed material with caution.

Component A GHS Classification

Classification according to HazCom2012 (GHS)

Physical Hazards: Flammable Liquid Category 4 H227: Combustible liquid.
Health Hazards:
- Skin Corrosion/Irritation Category 2 H315: Causes skin irritation
- Serious Eye Damage/Irritation Category 2 H319: Causes serious eye irritation
- Sensitization, Skin Category 1 H317: May cause an allergic skin reaction.
- Germ Cell Mutagenicity Category 2 H341: Suspected of causing genetic defects.
- Carcinogenicity Category 2 H351: Suspected of causing cancer.
Environmental Hazards: Chronic Aquatic Hazard Category 2 H411: Toxic to aquatic life with long lasting effects.

Main Symptoms: Irritation of eyes and skin. Symptoms include redness, itching, burning, tearing, swelling, and blurred vision. May cause rash/allergic reaction to the skin. Long term exposure may cause chronic effects.

GHS Label Elements

Contains: Bisphenol-A-Epichlorohydrin Epoxy Resin, Glycidyl Ethers
Signal Word: WARNING!
Hazard Statements:
- H227: Combustible liquid.
- H315: Causes skin irritation.
- H319: Causes serious eye irritation.
- H317: May cause an allergic skin reaction.
- H341: Suspected of causing genetic defects.
- H351: Suspected of causing cancer.
Precautionary Statements:

Prevention:
P201: Obtain special instructions before use.
P202: Do not handle until all safety precautions have been read and understood.
P210: Keep away from heat, hot surfaces, sparks, open flame; and other ignition sources. No smoking.
P261: Avoid breathing mist or vapor.
P264: Wash thoroughly after handling.
P272: Contaminated clothing should not be allowed out of the workplace.
P273: Avoid release to the environment.
P280: Wear protective gloves/protective clothing/eye protection/face protection.

Response:
P302+P352: IF ON SKIN: Wash with plenty of water.
P333+P313: If skin irritation or rash occurs: Get medical advice/attention.
P362+P364: Take off contaminated clothing and wash before reuse.
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313: If eye irritation persists: Get medical advice/attention.
P308+P313: IF exposed or concerned: Get medical advice/attention.
P391: Collect spillage.

Storage:
P403: Store in a well ventilated place.
P405: Store locked up.

Disposal:
P501: Dispose of contents/container in accordance with local/regional regulations.

Supplemental Label Information: None known.

Hazard Not Otherwise Classified (HNOC)
The above hazards are for the uncured A component of FX-70-6MP. Upon combination with the B and C components of FX-70-6MP an innocuous solid, that does not present any immediate hazards, is formed. Upon grinding or cutting through the cured product, the following hazards may apply. If deemed necessary, the use of an approved respirator or dust mask can be used to control exposure to any dust that may occur.

Health Hazard: Carcinogenicity Category 1A
OSHA Hazards: STOT, Repeated Exposure Category 2 (Lung)
Hazard Statements:
May cause cancer.
May cause damage to organs (lung) through prolonged or repeated exposure.
Can form explosive air-dust mixtures, avoid creating dust.

Precautionary Statements:
Do not breathe dust.
Do not allow dust to build up on surfaces.

3. Composition Information

General Information
This product is a mixture. Hazardous ingredients for each component are listed below.
May include other nonhazardous ingredients. May include other trace ingredients, see Section 15.

List of abbreviations and symbols:
Classification: Globally Harmonized System Classifications
The full text for H- phrases is displayed in section 16. All concentrations are in percent by weight unless otherwise noted.

4. First-Aid Measures

General Information
Provide general supportive measures and treat symptomatically. Symptoms may be delayed. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. If exposed or concerned: Get medical advice/attention. Wash contaminated clothing before reuse.

Routes of Exposure

Eye Contact: Immediately flush eyes with plenty of cool water for at least 15 minutes while holding the eyes open. Remove contact lenses if present and easy to do. If redness, burning, blurred vision, or swelling persists, consult a physician immediately.

Skin Contact: Remove contaminated clothing and product, immediately wash affected area with soap and water. Do not apply greases or ointments. If rash or irritation persists consult a physician.

Ingestion: Rinse mouth immediately. Do not induce vomiting unless told to do so by a poison control center or doctor. If vomiting occurs keep head low so that stomach contents don’t get into the lungs. Never give anything by mouth to an unconscious person. Consult a physician immediately.

Inhalation: If breathing is difficult remove patient to fresh air and keep at rest in a position comfortable for breathing. Give oxygen or artificial respiration if needed. If patient continues to experience difficulty breathing, consult a physician.

Most Important Symptoms
Irritation of eyes and skin. Rash. Symptoms include redness, itching, burning, tearing, swelling, and blurred vision.

5. Fire-Fighting Measures

Suitable Extinguishing Media: Extinguish with foam, carbon dioxide, dry powder, or water fog.

Additional Information: None known.

Hazards during Fire-Fighting: Hazardous decomposition products may occur when materials polymerize at temperatures above 500°F (260°C).

Fire-Fighting Procedures: Use standard fire-fighting procedures and consider the hazards of other involved materials. In case of fire and/or explosion do not breathe fumes. Self-contained breathing apparatus and full protective clothing must be worn. Move containers from fire area if you can do so without risk. Cool containers with flooding quantities of water until well after fire is out. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply.

6. Accidental Release Measures

Personal Precautions
Non-emergency personnel: Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep unnecessary personnel away. Wear appropriate personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid inhalation of vapors or mists. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.

Emergency personnel: Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate personal protection.

Clean-Up Methods

Small spills: Wipe up with absorbent material (e.g. cloth, fleece). Place in leak-proof containers. Seal tightly for proper disposal. Clean surface thoroughly to remove residual contamination.

Large spills: Stop the flow of material, if this is without risk. Dike far ahead of spill to contain material. Use a non-combustible material like vermiculite, sand or earth to soak up the product. Place in leak-proof containers. Seal tightly for proper disposal. Following product recovery, flush area with water. Prevent entry into waterways, sewer, basements or confined areas. Keep combustibles away from spilled material.

Cured Material: Chip or grind off surface. If you are grinding or cutting cured product, ensure good work practice and use of personal protective equipment as needed to control exposure to respirable dust. Take precautionary measures; do not allow dust to build up.

Environmental Precautions
Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid discharge into drains, water courses or onto the ground.

7. Handling and Storage

Handling
FX-70-6MP™ Multi-Purpose Marine Epoxy Grout
SAFETY DATA SHEET

Mechanical ventilation is recommended. Keep away from open flames, hot surfaces and sources of ignition. Wear appropriate personal protective equipment. Avoid contact with eyes, skin, and clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Avoid breathing fumes or vapors. When in use do not eat, drink, or smoke. Wash thoroughly after handling. Wash contaminated clothing before reuse. Avoid contact during pregnancy/while nursing. Observe good industrial hygiene practices. Do not empty into drains, avoid release to the environment.

To obtain optimal performance from Simpson Strong-Tie products, they must be properly installed and used in accordance with the installation instructions and design limits provided by Simpson Strong-Tie.

Storage

8. Exposure Controls / Personal Protection

Personal Protective Equipment

Protective Measure:
Wear appropriate personal protective equipment.

Eye Protection:
Wear chemical splash goggles or safety glasses with side shield. Face shield is recommended when splashing is probable.

Hand Protection:
Wear chemical-resistant gloves such as: Nitrile, neoprene, or butyl rubber.

Skin and Body Protection:
Avoid contact with skin, wear long sleeve shirt/long pants and other clothing as required to minimize contact.

Respirator Protection:
If engineering controls do not maintain airborne concentrations below recommended exposure limits, or if discomfort is experienced, an approved respirator should be worn.

General Hygiene:
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Engineering Controls
Mechanical ventilation or local exhaust ventilation is recommended. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and emergency shower.

10. Stability and Reactivity

Reactivity: This product is stable and non-reactive under normal conditions.
Chemical Stability: Stable under normal storage conditions.
Condition to Avoid: High heat and open flame.
Substances to Avoid: Oxidizing agents, acids, organic bases, and amines.
Hazardous Reactions: Hazardous polymerization does not occur.
Decomposition Products: Carbon dioxide, carbon monoxide, oxides of nitrogen, and other organic compounds.

11. Toxicological Information

Likely Routes of Exposure

Ingestion:
Expected to be a low ingestion hazard. Ingestion may cause irritation to the respiratory tract.
Inhalation: This material is a viscous liquid to semi-solid which does not easily form vapors. If heated vapors may cause irritation to nose and respiratory tract.

Skin contact: Causes skin irritation. May cause sensitization by skin contact.

Eye contact: Causes serious eye irritation.

Symptoms: Rash, redness, itching, burning, tearing, swelling, and blurred vision.

### Information on Toxicological Effects

#### Acute Effects

Toxicity: Not expected to be acutely toxic. Occupational exposure to the substance or mixture may cause adverse effects.

<table>

Skin corrosion/irritation: Causes skin irritation.

Eye damage/eye irritation: Causes serious eye irritation.

Respiratory sensitization: No data available.

Skin sensitization: May cause an allergic skin reaction.

Aspiration hazard: Not expected to be an aspiration hazard.

Specific Target Organ Toxicity

- Single Exposure: No data available.

#### Chronic Effects

Germ cell mutagenicity: Contains a component that is suspected of causing genetic defects.

Carcinogenicity: Limited evidence that components of FX-70-6MP component A may cause carcinogenic effects. FX-70-6MP Component C contains components that are listed carcinogens. These components are considered carcinogens only in their inhalable form. Due to the nature of this product, inhalation is highly unlikely. Exposure to respirable carcinogens is likely only when grinding or cutting cured product. Ensure good work practice and use of personal protective equipment as needed to control exposure to processing dust.

Reproductive toxicity: No data available.

Specific Target Organ Toxicity

- Repeated Exposure: FX-70-6MP Component C contains components that may cause damage to the lungs. Due to the nature of this product, inhalation is highly unlikely. Exposure is likely only when grinding or cutting cured product. Ensure good work practice and use of personal protective equipment as needed to control exposure to processing dust.

### Further Information

Toxicological, ecotoxicological, physical, and chemical properties may not have been fully investigated. Hazard data above is estimated based on best available information. Some workers with certain pre-existing medical conditions such as: asthma, allergies, or impaired pulmonary and/or liver functions, or who may be particularly susceptible to this material, may be affected by exposure to this material.

### 12. Ecological Information

#### General Information

Information given is based on data on the components and the ecotoxicology of similar products. The product is classified as toxic to aquatic life with long lasting effects. Avoid release to the environment.

#### Supporting Data

Persistence and degradability: This product is not expected to be readily biodegradable.

Bioaccumulative potential: No data available.

Mobility in soil: No data available.
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this product.

13. Disposal Considerations

Waste Disposal of Substance: Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Container Disposal: Empty containers or liners may retain some product residues; follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disposal of Cured Product: Chip or grind off surface. Solid material does not need special disposal consideration.

14. Transportation Information

FX-70-6MP Component A is not regulated for ground transportation by US DOT; check specific requirements for other regions and other shipping methods. Check limited quantity regulations prior to shipping, smaller volumes may qualify for LQ shipping exemptions.

UN number: UN3082
UN proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Bisphenol-A Epichlorohydrin Resin), 9, III, Marine Pollutant
Transportation Class: 9

Environmental Hazard: Yes
Required Labels: 9
Precautions: Other Hazard
ERG Code (IATA): 9L
EmS (IMDG): F-A, S-F

Additional Information

Special precautions for user: Read safety instructions, SDS and emergency procedures before handling.
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: This substance/mixture is not intended to be transported in bulk.

This information does not cover all specific regulatory or operational requirements of this product. The classifications for transportation may vary by container volume or different regional or national regulations.

15. Regulatory Information

United States

Federal Regulations: This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

2. Hazard Identification

**General Information**

FX-70-6MP™ is a 100% solids, three part system (2A:1B mix). It is high-strength epoxy grout repair mortar resistant to the chemical and physical strains of a marine environment. FX-70-6MP™ is moisture-tolerant and specifically designed for underwater applications as part of the FX-70® Structural Repair and Protection System. The three parts of this product have been individually assessed according to the Globally Harmonized System (GHS). The mixed product can be assumed to carry the hazards of each component until the product has been fully cured. The final cured product will be dark tan in color and can be considered nonhazardous. This Safety Data Sheet covers hazards and responses for Component B. See Component A and Component C Safety Data Sheets for complete product information. The product should be mixed thoroughly with a low speed drill. CAUTION: Product mixing may produce heat, wear appropriate personal protective equipment and handle mixed material with caution.

**Component B GHS Classification**

**Classification according to HazCom2012 (GHS)**

**Physical Hazards:** Not classified.

**Health Hazards:**
- Acute Toxicity, Oral Category 4 H302: Harmful if swallowed
- Acute Toxicity, Dermal Category 4 H312: Harmful in contact with skin
- Skin Corrosion/Irritation Category 1 H314: Causes severe skin burns and eye damage
- Serious Eye Damage/Irritation Category 1 H318: Causes serious eye damage
- Sensitization, Skin Category 1 H317: May cause an allergic skin reaction
- Sensitization, Respiratory Category 1 H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled
- Carcinogenicity Category 2 H351: Suspected of causing cancer

**Environmental Hazards:** Chronic Aquatic Hazard Category 3 H412: Harmful to the aquatic environment with long lasting effects

**Main Symptoms:** Damage to the eyes and skin. Symptoms include burns, redness, itching, tearing, swelling, and blurred vision. May cause rash/allergic reaction to the skin. May cause shortness of breath, coughing, or other asthma or allergy symptoms. May cause severe irritation or burns to the gastrointestinal tract and respiratory system. Long term exposure may cause chronic effects.

**GHS Label Elements**

- Corrosive
- Exclamation Point
- Chronic Health

**Contains:** Amines, Benzyl Alcohol, Bisphenol-A-Epichlorohydrin Epoxy Resin, Salicylic Acid

**Signal Word:** DANGER!

**Hazard Statements:**
- H302: Harmful if swallowed.
- H312: Harmful in contact with skin.
FX-70-6MP™ Multi-Purpose Marine Epoxy Grout
SAFETY DATA SHEET

SAFETY DATA SHEET

FX-70-6MP™ Component B
SAFETY DATA SHEET

H314: Causes severe skin burns and eye damage.
H318: Causes serious eye damage.
H317: May cause an allergic skin reaction.
H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H351: Suspected of causing cancer.
H412: Harmful to the aquatic environmental with long lasting effects.

Precautionary Statements:

Prevention:
P201: Obtain special instructions before use.
P202: Do not handle until all safety precautions have been read and understood.
P260: Do not breathe mist or vapor.
P264: Wash thoroughly after handling.
P270: Do not eat, drink, or smoke when using this product.
P271: Use only outdoors or in a well-ventilated area.
P272: Contaminated clothing should not be allowed out of the workplace.
P273: Avoid release to the environment.
P280: Wear protective gloves/protective clothing/eye protection/face protection.

Response:
P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P314: Get medical attention if you feel unwell.
P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
P333+P313: If skin irritation or rash occurs: Get medical advice/attention.
P363: Wash contaminated clothing before reuse.
P304+P340: IF INHALED: Remove victim to fresh air and keep comfortable for breathing.
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313: If eye irritation persists: Get medical advice/attention.
P308+P313: IF EXPOSED OR CONCERNED: Get medical advice/attention.
P391: Collect spillage.
P304: IF INHALED: Remove victim to fresh air and keep comfortable for breathing.
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313: If eye irritation persists: Get medical advice/attention.
P308+P313: IF EXPOSED OR CONCERNED: Get medical advice/attention.
P391: Collect spillage.

Storage:
P403: Store in a well-ventilated place.
P405: Store locked up.

Disposal:
P501: Dispose of contents/container in accordance with local/regional regulations.

Supplemental Label Information: None known.

Hazard Not Otherwise Classified (HNOC)

FX-70-6MP Component B contains chemicals which can be acutely toxic when inhaled as a dust or mist. Due to the viscous liquid to semi-solid nature of this product, this route of exposure is unlikely, and therefore unlikely to be harmful in its uncured form. Simpson Strong-Tie chooses to warn consumers of this potential risk to ensure safe use of the product. The above hazards are for the uncured B component of FX-70-6MP. Upon combination with the A and C components of FX-70-6MP an innocuous solid, that does not present any immediate hazards, is formed. Upon grinding or cutting through the cured product, the following hazards may apply. If deemed necessary, the use of an approved respirator or dust mask can be used to control exposure to any dust that may occur.

- Acute Toxicity, Inhalation
- Carcinogenicity
- STOT, Repeated Exposure
- Combustible Dust
- Harmful if inhaled.
- May cause cancer.
- May cause damage to organs (lung) through prolonged or repeated exposure.
- Can form explosive air-dust mixtures, avoid creating dust.

Precautionary Statements:

Do not breathe dust or mist.
Do not breathe dust.
Do not allow dust to build up on surfaces.

3. Composition Information

General Information
FX-70-6MP™ Multi-Purpose Marine Epoxy Grout
SAFETY DATA SHEET

This product is a mixture. Hazardous ingredients for each component are listed below. May include other nonhazardous ingredients. May include other trace ingredients, see Section 15.

List of abbreviations and symbols:
Classification: Globally Harmonized System Classifications
The full text for H-phrases is displayed in section 16. All concentrations are in percent by weight unless otherwise noted.

Composition – All concentrations are in percent by weight unless otherwise indicated.

4. First-Aid Measures

General Information
Provide general supportive measures and treat symptomatically. Symptoms may be delayed. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. If exposed or concerned: Get medical advice/attention. Wash contaminated clothing before reuse.

Routes of Exposure

Eye Contact: Immediately flush eyes with plenty of cool water for at least 15 minutes while holding the eyes open. Remove contact lenses if present and easy to do. If redness, burning, blurred vision, or swelling persists, consult a physician immediately.

Skin Contact: Remove contaminated clothing and product, immediately wash affected area with soap and water. Do not apply greases or ointments. Chemical burns must be treated by a physician. If rash or irritation persists, consult a physician.

Ingestion: Rinse mouth immediately. Do not induce vomiting unless told to do so by a poison control center or doctor. If vomiting occurs keep head low so that stomach contents don’t get into the lungs. Never give anything by mouth to an unconscious person. Consult a physician immediately.

Inhalation: If breathing is difficult remove patient to fresh air and keep at rest in a position comfortable for breathing. Give oxygen or artificial respiration if needed. If patient continues to experience difficulty breathing, consult a physician.

Most Important Symptoms
Damage to the eyes and skin. Symptoms include burns, redness, itching, tearing, swelling, and blurred vision. Rash/dermatitis. Shortness of breath, coughing, or respiratory irritation. May cause severe irritation or burns to the gastrointestinal tract and respiratory system. Permanent eye damage, including blindness, could result.

5. Fire-Fighting Measures

Suitable Extinguishing Media: Water fog, carbon dioxide, dry chemical powder, aqueous foam.

Additional Information: None known.

Hazards during Fire-Fighting: Irritating and toxic fumes may be produced at high temperature. Hazardous gases produced are carbon monoxide, carbon dioxide, oxides of nitrogen, cyanide, aldehydes, and miscellaneous hydrocarbons. Do not allow run-off from fire-fighting to enter drains or water courses.

Fire-Fighting Procedures: Use standard fire-fighting procedures and consider the hazards of other involved materials. In case of fire and/or explosion do not breathe fumes. Self-contained breathing apparatus and full protective clothing must be worn. Move containers from fire area if you can do so without risk. Cool
containers with flooding quantities of water until well after fire is out. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply.

6. Accidental Release Measures

Personal Precautions

**Non-emergency personnel:** Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep unnecessary personnel away. Wear appropriate personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid inhalation of vapors or mists. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.

**Emergency personnel:** Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate personal protection.

Clean-Up Methods

**Small spills (uncured):** Wipe up with absorbent material (e.g. cloth, fleece). Place in leak-proof containers. Seal tightly for proper disposal. Clean surface thoroughly to remove residual contamination.

**Large spills (uncured):** Stop the flow of material, if possible without risk. Dike far ahead of spill to contain material. Use a non-combustible material like vermiculite, sand or earth to soak up the product. Place in leak-proof containers. Seal tightly for proper disposal. Following product recovery, flush area with water. Keep combustibles away from spilled material.

**Cured Material:** Chip or grind off surface. If you are grinding or cutting cured product, ensure good work practice and use of personal protective equipment as needed to control exposure to respirable dust. Take precautionary measures; do not allow dust to build up.

Environmental Precautions

Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid discharge into drains, water courses or onto the ground.

7. Handling and Storage

**Handling**

Mechanical ventilation or local exhaust ventilation is recommended. Keep away from open flames, hot surfaces and sources of ignition. Wear appropriate personal protective equipment. Avoid contact with eyes, skin, and clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Avoid breathing fumes or vapors. When in use do not eat, drink, or smoke. Wash thoroughly after handling. Wash contaminated clothing before reuse. Avoid contact during pregnancy/while nursing. Observe good industrial hygiene practices. Do not empty into drains, avoid release to the environment. To obtain optimal performance from Simpson Strong-Tie products, they must be properly installed and used in accordance with the installation instructions and design limits provided by Simpson Strong-Tie.

**Storage**

Store locked up. Store in a closed container away from incompatible materials. Keep in original container, keep container tightly closed. Store in a cool, dry place out of direct sunlight, between 40-95°F (4-35°C). Keep away from heat and sources of ignition. Protect from physical damage.

8. Exposure Controls / Personal Protection

**Personal Protective Equipment**

**Protective Measure:** Wear appropriate personal protective equipment.

**Eye Protection:** Wear chemical splash goggles or safety glasses with side shield. Face shield is recommended when splashing is probable.

**Hand Protection:** Wear chemical-resistant gloves such as: Nitrile, neoprene, or butyl rubber.

**Skin and Body Protection:** Avoid contact with skin, wear long sleeve shirt/long pants and other clothing as required to minimize contact.

**Respirator Protection:** If engineering controls do not maintain airborne concentrations below recommended exposure limits, or if discomfort is experienced, an approved respirator should be worn.

**General Hygiene:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

**Engineering Controls**

Mechanical ventilation or local exhaust ventilation is recommended. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure.
limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and emergency shower.

### Stability and Reactivity

- **Reactivity:** This product is stable and non-reactive under normal conditions.
- **Chemical Stability:** Stable under normal storage conditions.
- **Condition to Avoid:** High heat and open flame.
- **Substances to Avoid:** Oxidizing agents and acids.
- **Hazardous Reactions:** Hazardous polymerization will not occur.
- **Decomposition Products:** Carbon dioxide, carbon monoxide, oxides of nitrogen and other organic compounds.

### Toxicological Information

#### Likely Routes of Exposure

- **Ingestion:** Harmful if swallowed. May cause severe irritation or burns to the gastrointestinal tract.
- **Inhalation:** May cause allergy or asthma symptoms if inhaled.
- **Skin contact:** Causes severe skin burns. Harmful in contact with skin. May cause an allergic skin reaction.
- **Eye contact:** Causes serious eye damage.
- **Symptoms:** Burns, redness, itching, tearing, swelling, and blurred vision. Shortness of breath, coughing, or respiratory irritation. Severe irritation or burns to the gastrointestinal tract and respiratory system.

#### Information on Toxicological Effects

**Acute Effects**

- **Toxicity:** Harmful if swallowed. Harmful in contact with skin.

- **Skin corrosion/irritation:** Causes severe skin burns and eye damage.
- **Eye damage/eye irritation:** Causes serious eye damage.
- **Respiratory sensitization:** May cause allergy or asthma symptoms or breathing difficulties.
- **Skin sensitization:** May cause skin sensitization by contact.
- **Aspiration hazard:** No data available.
- **Specific target organ toxicity**
Single exposure: No data available.

**Chronic Effects**

**Germ cell mutagenicity:** The available data does not indicate that any components of this product present at greater than 0.1% are mutagenic or genotoxic.

**Carcinogenicity:** Component B contains a component suspected of causing cancer. FX-70-6MP Component C contains components that are listed carcinogens. These components are considered carcinogens only in their inhalable form. Due to the nature of this product, inhalation is highly unlikely. Exposure to respirable carcinogens is likely only when grinding or cutting cured product. Ensure good work practice and use of personal protective equipment as needed to control exposure to processing dust.

**Reproductive toxicity:** Not expected to cause reproductive or developmental effects.

**Specific target organ toxicity**

**Repeated exposure:** FX-70-6MP Component C contains components that may cause damage to the lungs. Due to the nature of this product, inhalation is highly unlikely. Exposure is likely only when grinding or cutting cured product. Ensure good work practice and use of personal protective equipment as needed to control exposure to processing dust.

**Further Information**

Toxicological, ecotoxicological, physical, and chemical properties may not have been fully investigated. Hazard data above is estimated based on best available information. Some workers with certain pre-existing medical conditions such as: asthma, allergies, or impaired pulmonary and/or liver functions, or who may be particularly susceptible to this material, may be affected by exposure to this material.

12. **Ecological Information**

**General Information**

Information given is based on data on the components and the ecotoxicology of similar products. The product is classified as toxic to aquatic life and harmful to aquatic life with long lasting effects. Avoid release to the environment.

**Supporting Data**

**Persistence and degradability:** No data available.

**Bioaccumulative potential:** No data available for the product.

**Mobility in soil:** No data available.

**Other Adverse Effects**

No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this product.

13. **Disposal Considerations**

**Waste Disposal of Substance:** Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national regulations.
Container Disposal: Empty containers or liners may retain some product residues; follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disposal of Cured Product: Chip or grind off surface. Solid material does not need special disposal consideration.

14. Transportation Information

UN number: UN2735
UN proper shipping name: AMINES, LIQUID, CORROSIVE, N.O.S. (Isophorone Diamine), 8, III, Marine Pollutant
Transportation Class: 8 (9)
Precautions: Corrosive, Marine Pollutant
Packing Group: III
Environment Hazard: Yes
Required Labels: 8
ERG Code (IATA): 8L
EmS (IMDG): F-A, S-B

Additional Information

Special precautions for user: Read safety instructions, SDS and emergency procedures before handling.
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

This information does not cover all specific regulatory or operational requirements of this product. The classifications for transportation may vary by container volume or different regional or national regulations.

15. Regulatory Information

United States

Federal Regulations: This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

2. **Hazard Identification**

**General Information**

FX-70-6MP™ is a 100% solids, three part system (2A:1B mix). It is high-strength epoxy grout repair mortar resistant to the chemical and physical strains of a marine environment. FX-70-6MP™ is moisture-tolerant and specifically designed for underwater applications as part of the FX-70® Structural Repair and Protection System. The three parts of this product have been individually assessed according to the Globally Harmonized System (GHS). The mixed product can be assumed to carry the hazards of each component until the product has been fully cured. The final cured product will be dark tan in color and can be considered nonhazardous. This Safety Data Sheet covers hazards and responses for Component C. See Component A and Component B Safety Data Sheets for complete product information. The product should be mixed thoroughly with a low speed drill. CAUTION: Product mixing may produce heat, wear appropriate personal protective equipment and handle mixed material with caution.

**Main Symptoms:**

Damage to the eyes. Symptoms include redness, itching, burning, tearing, swelling, and blurred vision. Long term exposure may cause chronic effects.

**GHS Label Elements**

- **Contains:**
  - Crystalline Silica (Quartz), Fly Ash, Barium Sulfate

- **Signal Word:**
  - DANGER!

- **Hazard Statements:**
  - H319: Causes severe eye irritation
  - H350: May cause cancer.
  - H373: Causes damage to organs (lungs) through prolonged or repeated exposure.

- **Precautionary Statements:**
  - **Prevention:**
    - P201: Obtain special instructions before use.
    - P202: Do not handle until all safety precautions have been read and understood.
    - P260: Do not breathe dust.
    - P264: Wash hands thoroughly after handling.

**SAFETY DATA SHEET**

**FX-70-6MP™ Component C**

**Page 19 of 24**

---

**P271:** Use only outdoors or in a well-ventilated area.

**P280:** Wear protective gloves/protective clothing/eye protection/face protection.

**Response:**

**P304+P340:** IF INHALED: Remove person to fresh air and keep comfortable for breathing.

**P305+P351+P338:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**P310:** Immediately call a POISON CENTER/doctor.

**P337+P313:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**P312:** If exposed or concerned: Get medical advice/attention.

**Storage:**

**P403+P233+P235:** Store in a well-ventilated place. Keep container tightly closed. Keep cool.

**P405:** Store locked up.

**Disposal:**

**P501:** Dispose of contents/container in accordance with local/regional regulations.

---

**Supplemental Label Information:** None known.

**Hazards Not Otherwise Classified (HNOC)**

The above hazards are for the uncured C component of FX-70-6 1:1. Upon combination with the A and B component, an innocuous solid is formed, which does not present any immediate hazards. Upon grinding or cutting through the cured product, the following hazards may apply. Ensure that good work practices, and the necessary precautionary measures, are taken to maintain safe use of the product.

**OSHA Hazard:** Combustible Dust

**Hazard Statement:** Can form explosive air-dust mixtures, avoid creating dust.

**Precautionary Statement:** Do not allow dust to build up on surfaces.

---

### 3. Composition Information

**General Information**

This product is a mixture. Hazardous ingredients for each component are listed below. May include other nonhazardous ingredients. May include other trace ingredients, see Section 15.

**List of abbreviations and symbols:**

Classification: Global Harmonized System Classifications

*The full text for H-phrases is displayed in section 16. All concentrations are in percent by weight unless otherwise noted.*

**Composition – All concentrations are in percent by weight unless otherwise indicated.**

### 4. First-Aid Measures

**General Information**

Provide general supportive measures and treat symptomatically. Symptoms may be delayed. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. If exposed or concerned: Get medical advice/attention. Wash contaminated clothing before reuse.

**Routes of Exposure**

**Eye Contact:** Flush eyes with plenty of cool water for at least 15 minutes while holding the eyes open. Remove contact lenses if present and easy to do. If you experience redness, burning, blurred vision, or swelling, consult a physician immediately.

**Skin Contact:** Remove contaminated clothing and product; wash affected area with soap and water. Do not apply greases or ointments. If rash or irritation occurs consult a physician.

**Ingestion:** Rinse mouth. Do not induce vomiting. Consult a physician.

**Inhalation:** Remove patient to fresh air. Give oxygen or artificial respiration if needed. If patient continues to experience difficulty breathing, consult a physician.

5. Fire-Fighting Measures

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Additional Information:</td>
<td>Can form explosive air-dust mixtures, avoid creating dust.</td>
</tr>
<tr>
<td>Hazards during Fire-Fighting:</td>
<td>During a fire, gases hazardous to health may be formed.</td>
</tr>
<tr>
<td>Fire-Fighting Procedures:</td>
<td>Use standard fire-fighting procedures and consider the hazards of other involved materials. In case of fire and/or explosion do not breathe fumes. Self-contained breathing apparatus and full protective clothing must be worn. Move containers from fire area if you can do so without risk. Cool containers with flooding quantities of water until well after fire is out. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply.</td>
</tr>
</tbody>
</table>

6. Accidental Release Measures

**Personal Precautions**

**Non-emergency personnel:** Avoid generating dust. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid inhalation of dust. Ensure adequate ventilation. If the concentration of dust exceeds the permissible exposure limit wear a respirator. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep unnecessary personnel away. Wear appropriate personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Local authorities should be advised if significant spillages cannot be contained.

**Emergency personnel:** Keep unnecessary personnel away. Wear appropriate personal protective equipment.

**Clean-Up Methods**

**Small spills (not set):** Avoid dry sweeping. Do not use compressed air to clean spilled silica sand. Use damp towel to wipe up small spills. Dispose of in closed containers.

**Large spills (not set):** Avoid dry sweeping. Do not use compressed air to clean spilled silica sand. Use water spraying/flushing or ventilated or HEPA filtered vacuum cleaning system. Dispose of in closed containers.

**Set Material:** Chip or grind off. If you are grinding or cutting cured product, ensure good work practice and use of personal protective equipment as needed to control exposure to respirable dust.

**Environmental Precautions**

Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so.

7. Handling and Storage

**Handling**

Avoid generating dust. Mechanical ventilation or local exhaust ventilation is recommended. Use all available work practices to control dust exposure, such as water sprays. Wear appropriate personal protective equipment. When using, do not eat, drink or smoke. Avoid contact with eyes, skin, and clothing. Do not breathe dust. Keep airborne dust concentrations below permissible exposure limits. Wear a respirator if silica dust concentrations exceed PEL. Do not permit dust to collect and build up on work surfaces, use good housekeeping. Observe good industrial hygiene practices.

**Storage**

Use dust collection to trap dust produced during loading and unloading. Store in a closed container away from incompatible materials (See Section 10 of the SDS). Store in a cool, dry place out of direct sunlight. Store in a well-ventilated place. Protect against physical damage.

8. Exposure Controls / Personal Protection

**Personal Protective Equipment**

<table>
<thead>
<tr>
<th>Protective Measure:</th>
<th>Wear appropriate personal protective equipment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eye Protection:</td>
<td>Wear chemical splash goggles or safety glasses with side shield.</td>
</tr>
<tr>
<td>Hand Protection:</td>
<td>Wear chemical-resistant gloves such as: Nitrile, neoprene, butyl.</td>
</tr>
<tr>
<td>Skin and Body Protection:</td>
<td>Wear long sleeve shirt/long pants and other clothing as required to minimize contact. In case of dust production dust-proof clothing. Avoid contact with unhardened cement products, if contact occurs wash immediately with soap and water.</td>
</tr>
<tr>
<td>Respirator Protection:</td>
<td>Use NIOSH-approved air-purifying or supplied-air respirator where airborne concentrations of dust are expected to exceed exposure limits.</td>
</tr>
<tr>
<td>General Hygiene:</td>
<td>Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.</td>
</tr>
</tbody>
</table>
FX-70-6MP™ Multi-Purpose Marine Epoxy Grout

SAFETY DATA SHEET

Engineering Controls

Mechanical ventilation or local exhaust ventilation is recommended. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and emergency shower.

10. Stability and Reactivity

Reactivity: Stable and non-reactive under normal conditions of use and storage.
Chemical Stability: Stable and non-reactive under normal conditions of use and storage.
Condition to Avoid: Conditions which generate dust.
Substances to Avoid: Hydrofluoric acid, fluorine, chlorine trifluoride, or oxygen difluoride.
Hazardous Reactions: The product is stable if stored and handled as prescribed/indicated.
Decomposition Products: None.

11. Toxicological Information

Likely Routes of Exposure

Ingestion: Expected to be a low ingestion hazard.
Inhalation: Irritation to nose and respiratory tract.
Skin contact: Not expected to be a skin irritant.
Eye contact: Causes serious eye damage. Particles can cause corneal abrasion.
Symptoms: Redness, itching, burning, tearing, swelling, and blurred vision.

Information on Toxicological Effects

Acute Effects
Toxicity: Not expected to be acutely toxic. Occupational exposure to the substance or mixture may cause adverse effects.

Component | Estimate
---|---
FX-70-6MP Component C Toxicity Estimate | Acute, Oral, LD50 4332

Skin corrosion/irritation: Not expected to be a skin irritant.
Eye damage/eye irritation: Causes serious eye damage.
Respiratory sensitization: Not a respiratory sensitizer.
Skin sensitization: Not a skin sensitizer.
Aspiration hazard: No data available.
Specific target organ toxicity: No data available.
Single Exposure: No data available.
Chronic Effects
Germ cell mutagenicity: No data available.
Carcinogenicity: May cause cancer. This product contains components that are listed carcinogens. These components are considered carcinogens only in their inhalable form. Exposure to respirable carcinogens is also likely when grinding or cutting cured product. Ensure good work practice and use of personal protective equipment as needed to control exposure to processing dust.
Reproductive toxicity: No data available.
Specific target organ toxicity Repeated Exposure: Causes damage to organs (lungs) through prolonged or repeated exposure (inhalation). Repeated or prolonged exposure to respirable silica dust will cause lung damage in the form of silicosis. Symptoms include progressively more difficult breathing, cough, fever, and weight loss. Acute silicosis can be fatal.

Further Information
Toxicological, ecotoxicological, physical, and chemical properties may not have been fully investigated. Hazard data above is estimated based on best available information. Some workers with certain pre-existing medical conditions such as: asthma, allergies, or impaired pulmonary and/or liver functions, or who may be particularly susceptible to this material, may be affected by exposure to this material.

12. Ecological Information
General Information
Information given is based on data on the components and the ecotoxicology of similar products. This material is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Supporting Data

<table>

</tbody>
</table>

Persistence and degradability: Not readily biodegradable.
Bioaccumulative potential: Not expected to bioaccumulate.
Mobility in soil: No data available.

Other Adverse Effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this product.

13. Disposal Considerations
Waste Disposal of Substance: Do not allow material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Container Disposal: Empty containers or liners may retain some product residues; follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
Disposal of Cured Product: Chip or grind off surface. Solid material does not need special disposal consideration.

14. Transportation Information
DOT: FX-70-6MP Component C is not regulated for transport.
IMDG/IATA: FX-70-6MP Component C is not regulated for transport.

SAFETY DATA SHEET

Special precautions for user: Read safety instructions, SDS and emergency procedures before handling.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

This information does not cover all specific regulatory or operational requirements of this product. The classifications for transportation may vary by container volume or different regional or national regulations.

15. Regulatory Information

United States

Federal Regulations: This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Superfund Amendments and Reauthorization Act of 1986 (SARA):
